

# INTERCEPTIVE

# ORTHODONTICS

*Have you had your  
1st or 2nd Grader  
looked at for Orthodontics?*

*And did you know  
not all kids should wait  
till they are 12 years old  
for an orthodontic exam?*

# There is a new therapy called INTERCEPTIVE ORTHODONTICS.

*Give your child the advantage.*

**N**ot all kids have the necessary room for all their adult teeth to come in (erupt). When this occurs we can utilize *Appliance Therapy* to assist your child's **natural** growth and development to make room for those teeth to properly erupt.

By treating early you give your child the opportunity to grow healthy and happy while also minimizing the time he or she might have to wear "braces," if they have to wear them at all.

*Ask today if your child needs INTERCEPTIVE ORTHO so he or she can have a great smile. You will make a difference in their life, today!*

**D**on't wait! By waiting you are potentially placing your kids at a disadvantage both socially and dentally. Give your child the advantage today that will make a difference throughout their life.

*They will thank you for it!*

*Below are some photos of kids whose parents took action before it was too late.*
