

DO YOU KNOW WHAT YOUR DENTIST CAN DO FOR YOU?...

- **Do you snore?** If you, a family member or a friend are one of the millions who suffer from snoring and/or sleep apnea, your dentist can eliminate the problem and help you and your loved ones "sleep like a baby."
- **Do you play sports?** Protect you and your family's teeth and jaws against sports injuries with a custom-made mouthguard. It's a fact...the average dental sports injury will cost you over \$2,000 (per tooth) to repair! Don't wait for a dental accident to occur.
- **Are your teeth as white as you would like?** Whiten your teeth through bleaching.
- **Straighten your teeth,** even that one tooth that has been bothering you for years.
- **Replace missing teeth** with a bridge, implant or a partial.
- **Replace dentures** with dental implants.
- **Evaluate your child** for possible airway and allergy problems.
- **Create beautiful faces** by making sure your child's facial growth proceeds normally.
- **Stop thumb sucking.**
- **Alleviate the effects of stress** – often the cause of headaches and neck aches.
- **Stop grinding your teeth** with a simple nightguard. It'll protect your dental investment.
- **Eliminate hot and/or cold temperature sensitivity.**
- **Help you afford the best dentistry available.**
- **And much, much more.**

Whiter teeth with bleaching.

State-of-the-art mouthguards protect against injury.

IF YOU ONLY READ ONE PAMPHLET THIS VISIT, THIS SHOULD BE THE ONE.

Never before has there been such widespread patient interest, enthusiasm and excitement over Appliance Therapy – today's latest dental technology. Advances now allow us to help you look and feel better about yourself by improving your appearance and your health – even if you just want a brighter, whiter smile!

These funny looking things are actually the latest in today's dental technology. And they can do all this pamphlet has discussed and more. A lot more.

It's called APPLIANCE THERAPY – State-of-the-art treatment that your dentist can perform to cure more health problems, painlessly, with faster results and for less money than ever before.

Have you ever wanted to close a small space between your teeth, or move a tooth slightly to improve your smile? We can perform the tooth movement that will give you the cosmetic result you desire.

Did you know that your children don't have to wait for all of their permanent teeth to come in crooked before they can receive help? We may be able to save you thousands of dollars by performing interceptive orthodontic treatment.

So no matter what age you are, if you too would like to feel and look your best, just ask any of our staff for more information about these services.
